

## PRESS RELEASE

### **Project Team Solutions, Inc. announces Prologtraining.com, a new Video-On-Demand Training Site for Prolog Construction Management Software**

*Authorized Meridian Platinum Reseller provides subscribers access to hundreds of training videos for Prolog Software*

**CHANTILLY, Virginia (August 27, 2009)** – Project Team Solutions, an authorized Meridian Global Reseller serving the Eastern and Mid-Western United States, has launched its new Prolog® training website [www.prologtraining.com](http://www.prologtraining.com). The site provides access to hundreds of videos covering the features and functions of Meridian Systems Prolog construction project management software.

Project Team Solutions developed the site after years of providing conventional classroom style and on-line e-training courses. A Prologtraining.com subscriber has complete access to all of the content for a one year period. The content is available 24 hours a day, seven days a week. Users that sign up before September 30, 2009 will receive a 20 percent discount off the regular subscription price. Group discounts are also available. Complete subscription details are available at [www.prologtraining.com](http://www.prologtraining.com).

"Prolog users want a more efficient method to learn Prolog software. Prologtraining.com allows them to learn at their convenience without having to be away from their job responsibilities. Companies save money because the entire range of courses are included and their users don't have to incur travel related expenses," said Bonnie McFarland, director of professional services, Project Team Solutions.

Prologtraining.com has been designed to make it easy for users to quickly find the content they need. Training content can be sorted by Vendor, Product, Course, Topic, or Role. As an example, a field engineer can select that role from a drop down list and quickly find the videos that pertain to their job responsibilities.

Prologtraining.com already contains close to 400 videos, with more videos being added daily. "Our goal is to provide the most complete content about every aspect of Prolog software. Since Prolog is a very feature-rich product, most users want to learn more about utilizing all of its capabilities. Prologtraining.com allows companies to achieve an even higher return on their software investment," said Ty Witmer, president, Project Team Solutions.

Several companies are already finding that the site solves another important issue. "In the past it was difficult to get everyone together to provide the training necessary to use the system. This site makes it easy for each individual involved to get the training they need. With the entire project team efficiently using the system, our clients ultimately benefit." says Neil Stablow, vice president, Donohoe Construction Company. For more information on PrologTraining.com, please contact Project Team Solutions, Inc at 866-270-4605, email [info@projectteam.com](mailto:info@projectteam.com) or visit [www.prologtraining.com](http://www.prologtraining.com).

Prolog provides complete project control by automating all aspects of the construction project, from design to close out. By delivering in-depth project management features across projects and programs, Prolog helps both large and small organizations deliver their construction projects on time and on budget. Prolog is offered as both a desktop application and web-enabled solution. For more information on Prolog, call Meridian at (800) 850 2660, or visit: [www.meridiansystems.com](http://www.meridiansystems.com).
