ProjectTeam

AI-Powered Construction Management Software Platform

Connect the AI you already use to your live project data to get faster answers, cut down on manual updates, and make better-informed decisions.

Built on the CoreLink Data Model™

WHAT YOU CAN DO WITH AI

ASK PROJECT QUESTIONS

Get answers about RFIs, submittals, schedules, and costs in plain language.

VOICE & PHOTO CAPTURE

Turn voice notes, site photos, and handwritten notes into project records.

CREATE & UPDATE RECORDS

Add or update RFIs, field reports, punch lists, and custom forms.

DASHBOARDS & BRIEFINGS

Build reusable dashboards and scheduled summaries from live project data.

DRAFT EMAILS & UPDATES

Write follow-ups and status updates based on current project records.

CONFIGURE FORMS & FIELDS

Admins can add fields and build custom forms with a simple request.

SHARE RECORDS

Share records with the right people and groups on your project.

BULK IMPORT DATA

Use your AI tool to bring spreadsheet data into your projects.

AI FOR EVERY ROLE ON THE PROJECT

- **Project Managers:** Check open RFIs and submittals across every project.
- **Field Staff:** Turn site photos and handwritten notes into records.
- **Construction Managers:** Draft follow-up emails on overdue items in minutes.
- **Engineers:** Review open RFIs and create risk records for review.
- **Superintendents:** Log daily reports by voice right from the jobsite.
- **Owners:** Get quick status summaries across your whole portfolio.
- **General Contractors:** Track punch list progress and open RFIs by project.
- **Administrators:** Add fields and build new custom forms by request.

CORELINK CONNECTS THE DATA BEHIND YOUR AI

The CoreLink Data Model™ connects owners, contractors, and design teams on the same project records. When AI works from connected data, answers reflect the full project, within each person's existing access.

Every record the AI creates or updates saves directly to ProjectTeam.com, with the same activity history as any other record.

HOW AI WORKS WITH YOUR RECORDS

CREATE & UPDATE AI can add and edit	RFIs · Punch Lists · Field Reports · Directives · Contract Exhibits · Custom Forms
FIND & READ AI can look up	Projects · Documents · Drawings · Submittals · Schedules · Costs · Contracts · Contacts · Action Items
WHAT AI CAN'T DO Your team handles these	Delete records · Edit schedule and cost forms · Create projects · Manage users

SECURITY & CONTROL

- AI access is opt-in per organization
- Encrypted data transfer
- Role- and field-level permissions
- Full activity history on every record
- Sign in with ProjectTeam.com or SSO
- Only the records needed are shared
- Optional approval before AI changes
- Disconnect your AI tool anytime

GETTING STARTED

1 TURN ON AI ACCESS
Subscribers email support@projectteam.com, included at no added cost.

2 CONNECT YOUR AI TOOL
Sign in with your ProjectTeam.com login or single sign-on.

3 ASK IN PLAIN LANGUAGE
Work with live project data within the access you already have.

Contributors: contact sales@projectteam.com to upgrade and start using AI.

SETUP HELP & SUPPORT

Step-by-step setup guides are in the ProjectTeam.com help center, and our support team can walk you through connecting at support@projectteam.com.
